

Immaculate Conception School

One Washington Street, Newburyport, Massachusetts 01950
978-465-7780

August 2011

Dear Parent/Teacher/Employee:

Each year we are required to inform you that there are asbestos-containing materials within the building structure. These materials are properly contained and are managed under the Environmental Protection Agencies AHERA Program.

AHERA requires not only the inspection of all public and private schools for asbestos containing materials, but also has far reaching impacts on the maintenance, repair and/or removal of asbestos materials. Such materials are identified in a management plan, which includes a professionally developed strategy for the maintenance, repair or removal of asbestos containing materials.

Covino Engineering has been engaged by the Archdiocese of Boston Engineering Department to perform all inspections and develop management plans. A copy of the management plan for the school is available in the school office.

This notice is for informational purposes only. We are following the guidelines for asbestos management within the building.

Sincerely,
Mrs. Mary Reardon
